SUMMARY

CIT graduate with 200 hours of practicum experience and a mix of support, networking, and software work. Comfortable troubleshooting hardware and networks, administering Microsoft 365 and Active Directory, running cable and AV installs, and taking a software project from requirements through to a production level build.

SKILLS

Support & administration: Remote and on-site support, troubleshooting, Active Directory, Microsoft 365, Microsoft Defender, Windows 10/11, end-user training

Networking & installs: Structured cabling, patch cable crimping, switches, POE, Ubiquiti UniFi, desk phone systems, UPS monitoring (NUT), workstation deployment

Software & design: Systems analysis and design, use-case diagrams, DFDs, ERDs, Figma, Wix, HTML, React, Node.js, C#, SQLite

Hardware: PC building and repair, NAS and drive diagnostics, cable management

Professional: Client communication, technical and non-technical presentations, IT documentation, conflict resolution

WORK EXPERIENCE

IT Technician (Work-Integrated Learning Practicum) | Dare Technology, Picture Butte, AB

April - June 2026 (200 hours)

- Provided remote and on-site support for business clients, fixing issues across desktops, monitors, data drives, email, and network connectivity.
- Migrated client users from local accounts to Active Directory, including password resets, shared mailboxes, new email accounts, profile transfers with ProfWiz, and end-user training.
- Set up and imaged nine Dell workstations using Windows Configuration Designer and MSI packages, then applied BIOS, security, and Windows updates.
- Completed network and AV installs: ran and crimped cabling, racked switches, set up UPS units and Frame TVs, and managed cable runs, including a full office buildout.
- Setup a Proxmox Backup Server with minimal guidance and built Teams workflow automations to route backup and UPS alerts to dedicated channels, with documentation for the team to reuse.
- Administered Microsoft 365 across client tenants, including Defender email filtering and anti-spoofing, and deployed Field Effect security agents.

Spray Foam Labourer | Steve's Urethane, Lethbridge, AB

August 2023 - August 2025 (Seasonal)

- Worked in a safety-focused team and mentorship environment.
- Handled equipment, site prep, and problem solving under deadlines.

Gymnastics Summer Camp Coach | Lethbridge, AB

June - August 2023, June - August 2024

- Led daily activities, kept the group safe, and coordinated coaching schedules.
- Built communication, leadership, and adaptability through working with kids and parents.

PROJECTS

Systems Analysis & Design Project | Lethbridge Polytechnic, 2025 - 2026

Team project

- Worked on a team to analyze, design, and document an IT solution for a real local client, from first requirements to a final implementation-ready specification.
- Produced front-end mockups, documented back-end requirements, and built use-case diagrams, data flow diagrams, entity relationship diagrams, and structure charts.
- Wrote over 300 pages of formal documentation and presented at each milestone to technical and non-technical audiences.

ShelfCast, Sales Analytics & Forecasting Dashboard | Personal, 2025

SQLite

- Built a dashboard that imports CSV exports from a point-of-sale system, parses the data into a local SQLite database, and generates visual reports for top sellers, slow movers, trends, and category performance.
- Added a forecasting feature that predicts future sales, and reworked the tool so it can run for any small business with POS data.

Client PC Builds | Personal, 2025

PC hardware, Windows

- Built gaming and content-creation PCs for clients, guiding each through parts selection within budget, including all required peripherals and other expenses.
- Handled assembly, clean Windows installs, and software setup.

EDUCATION

Computer Information Technology Diploma

Lethbridge Polytechnic | Graduated 2026

Relevant coursework: Systems Analysis and Design, UI/UX Design, Networking
